

Remanufacturing and Exchange Services

Your only source for factory-authorized repair on Allen-Bradley products

Benefits

- Seven step remanufacturing process restores failed units to “like new” or better condition, extending equipment life and enhancing its performance
- Improve your overall equipment effectiveness (OEE)
- Stabilize your maintenance budget
- Reduce your unplanned downtime and frequency of repairs (longer Mean-Time-Between-Failure)*
- Improve speed to change (receive repaired products faster, eliminate compatibility problems)

Features

- Receive a 12 month warranty on the entire unit, not just the replaced/repaired components
- Ability to track your warranty, potentially saving you thousands of dollars on unnecessary repairs
- Only Rockwell Automation OEM specified components are used and firmware is upgraded

* Rockwell Automation customer surveys have shown that products repaired by third-party companies can result in three times the warranty failures compared to products remanufactured by Rockwell Automation.

Reductions in maintenance staff and spare parts inventory often lead to longer downtime and lost revenue when your automation assets malfunction or fail. To minimize downtime and keep production lines running, you need a reliable service partner that you can trust to provide quality repairs when you need them.

Many repair services can be costly, may only fix the symptoms instead of the problem and have limited availability. Rockwell Automation Remanufacturing and Exchange Services go far beyond other repair services with 10 remanufacturing centers (all ISO 9000/14000 certified) and nine exchange hubs.

Every Allen-Bradley® product repaired undergoes our comprehensive seven step remanufacturing process (see back). To help ensure your complete satisfaction, we invest each year in maintaining and updating the latest testing equipment.

Rockwell Automation offers two levels of Remanufacturing and Exchange Services:

Economy Services

Your failed or malfunctioning product is sent through our seven step process and returned via normal shipping.

Priority Services

Obtain next day shipment from over 50,000 remanufactured Allen-Bradley catalog items inventoried at our global parts hubs. Return shipping costs are waived if the failed, non-warranty unit is returned within 15 days. Emergency 24x7x365 service is also available.
